Covid 19: Re-opening of Schools for Nursery and P1-3 Pupils	
Policy/Procedure').	
Operate pods of 8 in nurseries including over lunch. Contact EY HQ if	
requiring assistance – after discussion with EY HQ, some groups in Loch PS	
Nursery Class will have 9 children.	
Decrease physical interactions generally by looking at staff and pupil	
movement throughout the school. Movement between classrooms should	
be minimised wherever possible. Where this cannot be avoided, consider	
providing cleaning supplies to enable wiping down of their own surfaces on	
entry and leaving – all classes at Loch PS and Nursery Class have cleaning	
spray/wipes to clean areas as required.	
No assemblies or other typically large gatherings.	
Introduce a flexible approach to the physical reconfiguration of teaching	
and non-teaching areas, taking account of hygiene, staffing, supervision and	
individual learner and staff needs.	
Seating, desks and other heavy traffic work areas e.g. copier rooms should	
be safely spaced to promote physical distancing.	
Determine and adhere to safe levels of occupancy in heavy traffic work	
areas taking account of physical distancing controls.	
 Use one-way or keep left systems, staggered breaks and starts – At Loch PS 	
and Nursery Class all stakeholders should follow the signs provided for one-	
way systems and arrows on floor to indicate which side to walk on.	
 Access classrooms directly from outside where possible. 	
 Enforce staggered use of staffrooms, break areas and offices to limit 	
occupancy at any one time with appropriate signage. Encourage cleaning	
items after each use including cooking equipment, crockery and cutlery –	
staff must use own items, clean them after use (dishwasher should not be	
used) and leave no items lying around. No items should be left on staffroom	
table/surfaces/draining board. Staffroom maximum capacity is 8 and	
meeting room is 3. GP area can also be used by staff where required.	

 Maximise outdoor space throughout the day ensuring those with complex 	
needs or disabilities are not disadvantaged and hygiene arrangements are	
in place for shared equipment.	
Consider integrated procedures and guidance for pupils leaving and	
returning to school e.g. lunchtime – pupils must follow hygiene procedures	
when leaving and on return to school.	
Consider arrangements for pick up/drop off to ensure physical distancing	
can be maintained and large gatherings avoided – staggered start and stop	
times as well as different entrances/exits will be used to minimise	
overcrowding (all staff must follow the guidance within 'Loch PS and	
Nursery Class Covid 19: Re-opening of Schools for Nursery and P1-3 Pupils	
Policy/Procedure').	
 Encourage parents to consider the most appropriate travel arrangements 	
including, as far as it is safe to do so, walking, cycling and scootering to help	
reduce unnecessary travel on buses or public transport.	
 Ensure that transport providers, including those via SPT, are following all 	
necessary government and industry advice to reduce risk e.g. encouraging	
compliance of wearing face coverings age 5 and over.	
 Any works, repairs or maintenance carried out within the school should 	
adhere to physical distancing and hygiene measures.	
 Recognise concerns raised by members of the BAME community including 	
supporting individual requests for additional protections in discussion with	
staff, pupils and families.	
 No additional general protections are required for particular categories of 	
children or staff, such as those with underlying health conditions. However	
changes in the national protection levels, in individual circumstances	
and/or in line with any specific clinical advice may require a review of	
individual risk assessments. Staff should use the South Lanarkshire Council	
Self-Assessment form to help inform discussion with line managers on	
these issues.	

Additional Local Concerns To be completed by assessor		 Use floor markings, signage and posters throughout the building to keep employees informed on things like maximum room capacity and direction of travel – staff must adhere to maximum capacities. Designate a well ventilated room as an isolation space for anyone showing symptoms of infection – this will be the PT office in Loch PS and Nursery. They should be sent home as soon as possible. Limit face to face meetings indoors. Adult visitors to the school should be strictly limited to those that are necessary to support children and young people or the running of the school. Those providing essential services e.g. psychologists, social work should be able to visit schools with appropriate mitigations, adherence to local controls and in co-operation with the service provider. A register must be kept – visitors to the school will sign in at the main entrance bubble. Adhere to Education Resources Guidance for Visiting Services and External Agencies Procedure Note - Revised October 2020 Staff and pupil movement between schools including peripatetic / supply staff should be kept to a minimum. Staff have clear advice on dealing with enquiries from the public. Provide all necessary support to those requiring it to follow these measures e.g. for those with visual impairment or limited mobility. All employees should be aware of, and adhere to, Transport Scotland's latest Advice on How to Travel Safely including car sharing. Car sharing should be avoided wherever possible. https://www.transport.gov.scot/coronavirus-covid-19/transport-transition-plan/advice-on-how-to-travel-safely/#section-63888 		
 Increased risk of exposure to Covid- 19 infection as a result of poor personal hygiene 	12 High	• Ensure that all staff, pupils and visitors are aware of the high importance of frequent and thorough handwashing / sanitising. Schools should identify	4 Low	

opportunities to reinforce the importance of hygiene measures throughout	
the school day.	
• Ensure that signage is applied appropriately, including in toilets.	
• Ensure that all staff and pupils sanitise/wash their hands frequently with	
soap and water for 20 seconds and dry thoroughly.	
Ensure that sufficient handwashing / sanitising facilities are available for	
those entering and exiting, including for visitors.	
• Ensure that all staff and pupils clean their hands on arrival at the setting,	
before and after eating, after sneezing or coughing, when changing	
classrooms, when entering/leaving the building, before/after eating and	
after using the toilet.	
• Ensure that all staff and pupils use a tissue or elbow to cough or sneeze and	
use lidded bins for tissue waste, cleaning hands afterwards and ensure bins	
are emptied regularly so as not to excessively fill up .	
• Ensure that help is available for staff and pupils who may require assistance	
in accessing hygiene facilities.	
 Anti-viral spray and paper towels provided for regular personal use at 	
computer keyboards, photocopiers, telephones and other equipment.	
• Ensure that all staff and pupils are encouraged not to touch their face	
including mouth, eyes and nose.	
• Ensure that help is available for children and young people who have	
trouble cleaning their hands independently e.g. adult assistance or use of	
sanitiser rather than soap and water if easier.	
Consider how to encourage young children to learn and practise these	
habits through games (no outward singing).	
 No sharing of food and drinks including milk. 	
• Water dispensers can be used with care and those doing so should sanitise	
their hands before and after use. To reduce usage, staff and pupils should	
bring their own filled bottle each day which can be topped up during the day	
if required. Direct access by primary aged children should be avoided, unless	
age appropriate. Supervision may be necessary.	

Additional Local Concerns	 Early Learning and Childcare staff do not need to wear face coverings wh interacting with nursery children. Face coverings should also be worn in the following circumstances: At all times when adults in early years settings, adults in primary schools, and adults and young people in secondary schools are moving around in corridors, office and admin areas, canteens (except when dining) and othe confined communal areas, (including staff rooms and toilets) By parents and other visitors to all school sites (whether entering the building or otherwise), including parents at drop-off and pick-up. In line with the current arrangements for public transport, where adults and children and young people aged five and over are travelling on dedicated school transport. School Support Assistants and those supporting children with Additional Support Needs, who may routinely have to work within two metres of primary school pupils, should wear face coverings as a general rule. However, the use of opaque face coverings that face coverings may limit communication and could cause distress to some children – appropriate use of transparent face coverings may help in these circumstances. Staff, children and young people should receive clear guidance on how to put on, remove, store and dispose of face coverings. Consider regular messaging to staff, parents and learners about face coverings, including guidance or practical demonstrations to support efficacy of wearing. Consider any equity concerns and have a contingency supply. 	er t
To be completed by assessor		

 Increased risk of exposure to Covid- 19 infection as a result of poor environmental hygiene 	 Weekly routine of electrostatic spraying in all areas. All areas will be electrostatically sprayed weekly with a protective covering on a Friday at 5pm. All staff should exit the building before this occurs. An enhanced cleaning regime will be in place including an increased focus (at least twice daily (SLC undertaking 3 times)) on high intensity touchpoints such as door furniture (push plates, handles), wall furniture (light switches, sockets) and sanitary ware to ensure those spaces are sanitised more regularly using product which is active against bacteria and viruses. Ensure more frequent cleaning of rooms/areas that must be used by different groups including staffrooms (Since August 20 this has involved increased cleaning levels and a move from visual to sanitised cleans. Also includes increased cleaning within nursery and ASN settings). Introduce a clear desk policy and remove unnecessary items from classrooms and work areas to ensure all areas are more easily cleaned – all desks should be cleared at the end of the day, along with worktops and all surfaces. Remove soft furnishings, soft toys and toys that are hard to clean (such as those with intricate parts). Children and young people should be encouraged not to bring toys from home or share personal belongings. 	
	increased cleaning levels and a move from visual to sanitised cleans. Also	
	Introduce a clear desk policy and remove unnecessary items from	
	desks should be cleared at the end of the day, along with worktops and all	
	those with intricate parts). Children and young people should be	
	 Staff should use their own crockery/cutlery in staff areas and ensure these are cleaned using detergent and dried thoroughly before being stored for re-use. No item should be left out in the staffroom. 	
	• Limit the use of shared resources, including those usually taken home. Keep bags off desks and worktops. Any shared materials and surfaces should be cleaned more frequently.	
	 Schools can consider additional mitigation from surface contamination of jotters, textbooks and library books by 2 methods, evaluate the most appropriate:- quarantining these for 72 hours, or 	
	 via careful hand washing/sanitisation before and after use. 	

 Anti-viral spray and paper towels will be provided for regular use of shared equipment such as computer keyboards, photocopiers and telephones. Avoid the sharing of telephones or radio devices. Consider additional cleaning arrangements for specialist equipment e.g. in practical subjects or ASN provision e.g. SSERC guidance or Enozo spray in ASN and Early Years settings. Lidded bins for tissues are emptied throughout the day so as not to excessively fill up, and there are adequate disposal facilities for cleaning staff. Consider regular meetings with cleaning staff to confirm cleaning regimes, adjust as necessary to take account of high traffic or problem areas and ensure that levels of supplies are maintained. If a pupil, member of staff or visitor has been confirmed as being tested positive for COVID-19 Facilities Services will ensure that enhanced cleaning within the area is provided where appropriate. 	
Ventilation	
Seek to increase ventilation levels by actively opening windows and doors where practical and safe to do so. (Heating systems have been increased in both temperature and length of running time to assist with maintaining room temperatures).	
 Arriving in your classroom leave the door open (will also reduce contact with door handles). Ensure no obstructions by opening blinds/curtains and removing any items blocking vents. When pupils arrive open windows to their fullest as allowed by the restrictor. Top windows should be open where possible. If the room is cold and feels well ventilated some windows can be closed. However, those windows which have the least impact, relative to causing draughts, should remain open to at least the minimum amount. At lunchtime, breaks and in between classes windows should be opened fully for 5-10 mins. 	

		 Lower temperatures and likely windy conditions in the winter months will increase the natural ventilation through openings. This means that partially opening windows and doors can still provide adequate ventilation at the same time as maintaining room temperatures. Consider flexibility in permissible clothing while indoors and the benefits of re-designing seating plans to reflect individual pupil or staff temperature preferences. At the end of the day, remember to close all windows for security reasons. Internal fire doors should not be held open unless they have a hold open and self-closing mechanism which responds to a fire alarm activation. Not all classrooms have opening windows and the flow of air in mechanica systems are designed to take account of normal occupancy capacities and have been set to run longer, however as with other classrooms consider leaving doors open to further enhance air flow. Any specific issues should be reported in the normal way to allow a member of the technical team to carry out an assessment of any action required. 		
Additional Local Concerns To be completed by assessor				
4. Increased risk of exposure to Covid- 19 infection as a result of poor communication	12 High	 All staff have been briefed on new working arrangements and understand the role they have to play. All staff will keep abreast of any new changes and ensure they are confident with the 'Loch PS Covid-19: Re-opening of Schools Policy/Procedure', 'Loch PS Covid-19 Continuity of Learning Policy/Procedure', 'Loch PS and Nursery Class Covid-19: Re-opening of Schools for Nursery and P1-3 Pupils Policy/Procedure' as well as any regular updates. All staff have the opportunity to discuss new working arrangements on an ongoing basis and are aware of how to report concerns. Designate a member of staff as 'Covid Officer' – at Loch PS and Nursery Class, Miss Simpson (HT) is the 'Covid Officer'. 	4 Low	

 All staff are aware of, and have access to, the full range of Corporate 	
guidance on managing risks associated with Covid-19 including Education	
Resources Safe System of Work – Covid-19.	
Staff understand Covid-19 infection symptoms and what to look out for and	
should be supported to follow up to date Health Protection advice.	
 Zero tolerance of symptoms should be in place and staff will follow strict 	
compliance with current Government guidance in relation to Test and	
Protect and restrictions on movement/self-isolation.	
• All staff and learners must know that they must inform a member of staff or	
responsible person if they feel unwell with symptoms of Covid-19 – this	
must be reported to the Class Teacher then to Miss Simpson (HT) or Miss	
Harrington (Acting PT).	
• All visitors including parents, contractors and suppliers are advised not to	
enter the premise unless previously agreed by the school management	
team. Where agreed, they are made aware of local protocols for entering	
the premises and safe use of facilities such as toilets, and must sign the	
register.	
• The school provides regular, timely and clear communication about the	
approach they are taking to recovery.	
• All pupils and parents are aware of the arrangements and controls within	
the school and their responsibility in taking these forward.	
• Consider parental surveys/communications to encourage walking, cycling,	
scootering, park and stride and remind parents of responsible parking, drop	
off and pick up.	
• The school has arrangements for good quality dialogue with pupils about	
the measures and any changes.	
 The school will ensure its approach co-ordinates with national and local 	
guidance to help promote a coherent feel to provision of services and will	
designate a member of staff as Covid Officer to help take this forward. The	
'Covid Co-ordinator' in Loch PS will be Miss Simpson (HT).	

	 Senior leaders have systems in place to receive, review, retain and share all relevant information issued locally and nationally including Information Updates, Newsletters and Procedure Notes. Senior leaders understand the agreed process for managing a suspected case of Covid-19 infection. <u>Test and Protect</u> 	
	 The effective application of Test and Protect in the school environment will be an important means of preventing any spread of the virus and will be led by the local Health Protection Team. School leaders should understand the process for managing a confirmed case(s) of Covid-19 infection and how to engage with their local Health Protection Team (HPT) via SLC Education Resources. Adhere to 'Heads of Establishment Support Guide for Managing Positive Cases of Covid-19 in Schools and Educational Settings'. The processes for case management are communicated to and understood by staff, including the roles of Public Health and SLC. 	
	 Support for those who have underlying health conditions Clinically vulnerable staff (including those who have underlying health conditions, but who would not be on the shielding list) can continue to work in schools, subject to a dynamic risk assessment confirming it is safe to do so. Keep the risk of exposure as low as is practically possible to pregnant women, particularly in the third trimester Normal pregnancy risk assessments should also be undertaken, and appropriate attention paid to mental health and wellbeing. 	
Additional Local Concerns To be completed by assessor		

 Increased risk of exposure to Covid- 19 infection risks through practical activities 	12 High	 Review existing risk assessments and safe systems of work for practical subject areas taking account of the controls above and Education Scotland National Improvement Hub – Practical Activities Guidance. 	4 Low	
Additional Local Concerns To be completed by assessor				
6. Additional Risk Areas	12 High	 Review all risk assessment controls in the context of the current protection level for the establishment /local area (see section below) and the associated enhanced measures. Consider Personal Risk Assessments for those employees deemed clinically vulnerable by NHS. Review existing Fire Evacuation Plans including PEEPs. Review existing Health Care Plans, risk assessments and Behaviour Assessment and Support Plans (BASPSs) for children with more complex needs taking account of the controls above. Ensure that staff are fully aware of the wellbeing supports available to them including those via South Lanarkshire Council's Employee Assistance Scheme. Consider in-school support mechanisms for staff to talk, share concerns, apply wellbeing approaches. Consider new guidance on supporting the mental health and wellbeing of children and young people. Education Scotland have provided complementary information on Mental health & wellbeing : supports for practitioners, parents, carers & young people. Property inspection arrangements will continue including required checks such as water quality, utilities, lifting equipment and fire controls. 	4 Low	
Additional Local Concerns To be completed by assessor				

7. Enhanced and targeted protection:(a) At home asymptomatic testing

(b) Levels 3 and 4 and 'Lockdown' **Requirement to be aware of when Lanarkshire may be operating at these levels)

In addition to the controls areas outlined above, these enhanced protective measures should also be applied for schools within a local area that has been designated as Protection Level 3 or 4.

These measures have been designed to enhance protections in areas where evidence suggests there may be higher potential risks as prevalence increases, including for those people who are at the highest clinical risk.

It is important to note that these measures are in addition to, not instead of, the protective measures set out above.

At-Home Asymptomatic Testing

Being phased in from Feb 2021 for all staff in schools/EY settings and senior phase pupils. Although voluntary all are encouraged to participate in this scheme in order to support infection control measures where people may be asymptomatic and in attendance.

Headteachers / HoC should review NHS/SLC guidance on At Home Lateral Flow Testing arrangements and complete the **SLC Safe Use of At Home Lateral Testing generic risk assessment**. Controls will include:

- Ensure all staff and relevant pupils are aware of the scheme and asked to participate.
- Ensure consent form signed and instructions on testing and recording of results provided. Testing days at Loch PS and Nursery Class will be Monday and Thursday before coming to school.
- Ensure safe storage of kits and record the distribution of kits in accordance with guidance and with adherence to physical distancing.

Protection Level 3 – Enhanced protective measures

- Parents should discuss with their GP or clinician whether children with the highest clinical risk should still attend.
- The majority of workplaces can be made safe for staff. To ensure this remains the case individualised risk assessments for school staff members with the highest clinical risk must be in place and updated appropriately. Staff should speak with their manager to ensure all appropriate protections are in place.
- Decisions on appropriate protections should be informed by individual risk assessments, and may include protective measures in the workplace, mitigations such as working remotely (e.g. at home or in different settings) or carrying out different tasks within their usual workplace. If protections cannot be put in place, staff can discuss whether they need a fit note with their GP or clinician.

 their employer or an occupational health adviser, it is not possible to make a workplace safe for staff. Being in receipt of one of these letters does not automatically mean that staff should not attend work if appropriate protections are in place. Decisions on appropriate protections should be informed by individual risk assessments, and may include protective measures in the workplace, mitigations such as working remotely (e.g. at home or in different settings), or carrying out different tasks within their usual workplace. Schools should be prepared to engage with enhanced testing responses to COVID-19 outbreaks in schools, where recommended by the Incident Management Team. Physical education within school settings should only take place out of doors. Schools should consider what types of activity and clothing may be most appropriate in view of weather conditions. While physical education
--

then schools may use their judgement as to whether it is safe for children	
to be outside.	
 Pausing of the provision of non-essential activities or clubs outside the 	
usual school timetable.	
Lockdown	
Attendance in schools should be restricted to:	
 Vulnerable children and children of key workers only. 	
 Only staff who, in the judgement of the local authority and schools, are 	
required to attend in person to give effect to revised school reopening	
arrangements and support remote learning should do so.	
• Take advantage of the space in primary and secondary schools, e.g.	
during the period where open only for keyworker/vulnerable children,	
to create 2 metre spacing between pupils where possible.	
All staff and pupils attending schools during lockdown should continue	
to implement and strictly observe the mitigations set out within this	
risk assessment.	
 A register of children and rota of staff in daily attendance must be 	
maintained to aid in contact tracing should a positive case arise.	
 Schools may, if absolutely necessary, re-group vulnerable pupils and 	
children of key workers (i.e. move them into different groups to those	
they were in prior to lockdown). This should be kept to the minimum	
necessary to ensure effective, safe learning and teaching arrangements	
are in place. It should be done in a way which meets children's needs	
and enables them to engage in learning and teaching which is age and	
stage appropriate. Upon a full return to school, children and young	
people may return to their original groupings.	
 All staff, student teachers and pupils should continue to be vigilant for 	
coronavirus symptoms.	
 Staff at the highest clinical risk (individuals on the shielding list) should 	
work from home, and if they cannot do so, they should not work.	
work norm nome, and it they cannot do so, they should not work.	

	 Children and young people at the highest clinical risk (individuals on the shielding list) should not attend school in person. 		
--	--	--	--

Note on Manager Actions:

Heads and Managers should use this assessment to cover general and local matters specific to their establishment. This local information can be added above to create an overall action plan to help ensure everyone understands what is required of them and how they can best protect themselves and others.

You should review this document in partnership with staff and their representatives, adapt as necessary for your establishment, sign off and share with all persons involved. It is good practice to review these arrangements on an ongoing and regular basis with your team.
